Health and Medtech Partnering Forum

AI, Precision Health, and Agetech

July 25, 2025 Rooms 501 & 502, Nangang Exhibition Center, Hall 1

Canada boasts a well-established life sciences sector and developed key strengths in AI, precision health, digital health and medtech thanks to its thriving innovation ecosystem and open business environment, underpinned by a national AI strategy.

The Canadian Trade Office in Taipei (CTOT) is excited to host a Canada-Taiwan Health and Medtech Partnering Forum on Friday, July 25, 2025, during BIO Asia–Taiwan 2025, featuring five outstanding Canadian firms presenting their latest AI, precision health, pharmaceutical, and medical device solutions. Taiwanese senior care company, Jubo Health, will share its experience and insights on Canada-Taiwan business and tech collaboration, and a cutting-edge rehabilitation glove jointly developed by NRC and ITRI will also be showcased at the event.

Don't miss this opportunity to hear from the Canadian businesses and meet with them one-on-one to discuss potential partnership opportunities. Participants will also learn about how to leverage the Canadian International Innovation Program (CIIP)*!

Register NOW :

https://forms.gle/oC6LCfmaJaVmWMwC7

Successfully registered participants will receive a confirmation email five days prior to the event
